

**2nd IENE Energy Week
Athens, 10-14 November, 2008**

PHOTOVOLTAIC WORKSHOP

Under the Auspices of the Ministry of Development

Organized by IENE in association with HELAPCO

**Wednesday, November 12, 2008
Conference Center Eugenides Foundation, Paleo Faliro, Athens**

The Institute of Energy for South East Europe (IENE) in association with the Hellenic Association of Photovoltaic Companies (HELAPCO) is organizing a Workshop in Athens as part of the annual "Energy Week". The 'Energy Week' will be held in Athens, from November 10-14, under the auspices and with the support of the Ministry of Development and with the backing of major Greek and other European energy companies.

The main objectives of the Photovoltaic Workshop is to review the current situation of the PV market in Greece, to relate the European and Mediterranean experience in the field and to identify legal, administrative and other non technical obstacles, which so far prevent market development. Furthermore, the workshop will identify and examine the appropriate policies and proposals which will enable the expansion of the PV sector in Greece.

The scope of the Workshop is to contribute towards the establishment of a long-term sustainable PV market in Greece by maximizing the economic and social benefits.

* Based on Valencia presentation
